List of Graduates

In the Several Schools, at the Annual Commencement, June 8, 1882.

The College contains eight different Schools, viz: The Schools of Latin, Greek, Mathematics and Astronomy, Modern Languages, English and History, Natural Science, Moral Philosophy and Theology. Two examinations in writing are held in each School in the course of the year. A student attaining to a grade entitling him to a place in the First Division, is marked "Distinguished." A student whose average grades place him in the First Division in all examinations in the School, becomes a graduate in that School. One who is a graduate in five Schools of the College, and has fair standing in the Junior and Intermediate Classes of two other Schools, receives the degree of Bachelor of Arts; and one who is a graduate ein ach of the first-named seven Schools receives the degree of Master of Arts.

William Jewell College.

GENERAL STATEMENT.

WILLIAM JEWELL COLLEGE is under the control of the Baptists of Missouri, acting through a Board of Trustees, who conduct the finances, appoint the officers, and prescribe the general control of the Institution. It originated with the earliest efforts of this denomination to organize measures to promote the preaching of the gospel in the State, when it was felt expedient to have a Theological and Literary Seminary, in which candidates for the ministry, and young men in general, might receive a liberal education under religious in fluences.

The Trustees fully realize that, as the development of Christian truth and its defense against corrupters and opposers are best promoted by higher education and advanced science, it is necessary that an institution intended for the preparation of young men for the functions of the sacred ministry, should furnish a culture of the very highest order. They have, therefore, adopted an organization which contemplates the most comprehensive curriculum, the best methods of instruction and progress with the march and demands of science. They intend that everything taught shall be taught accurately and thoroughly, and that nothing shall be proposed for which there is not a qualified instructor and necessary apparatus.

ORGANIZATION.

The College is organized in eight schools, over each of which presides a Professor, who fixes the mode of instruction, the standard of graduation and the method of determining it. Each student is required to select so many of these schools as shall occupy three recitations daily. No student is permitted to attend more than one recitation in any school until he has paid his tuition and entered his name on the book of the Professor from the Treasurer's receipt. No exchange of schools is allowed after one week, except by consent of both Professors.

I .- SCHOOL OF LATIN.

ROF . SEMPLE.

The subjects taught in this school are the Latin Language and Literature, and History of Rome. The school is divided into three classes:

I.—Junior.—Text Books: Virgil, Sallust, Cicero's Orations, Cornelius Nepos, Arnold's Prose Composition, Gildersleeve's Latin Grammar, Liddell's History of Rome.

II.—Intermediate.—Text Books: Horace, Livy, Cicero pro A. Milone, Zumpt's Latin Grammer (for reference), Arnold's Prose Composition.

III.—Senior — Text Books: Livy, Tacitus, Juvenal, Brown's Roman Classical Literature, Original Exercises, Zumpt's or Madvig's Latin Grammar (for reference).

The mode of instruction in this school is both analytical and synthetical. As far as possible, the student is taught not only the facts of the structure of the language, but also the principles which underlie them. Other faculties than that of

the memory must be trained before the student can acquire an accurate and comprehensive knowledge of the principles and a clear perception of the constituent elements of a language. Whilst, therefore, in the preparatory department the beginner is thoroughly drilled in the paradigms of the variable parts of speech, he is yet taught by daily oral and written exercises to systemize and classify the principles of their accidents and construction. It is hoped that thereby the nature and construction of sentences will be progressively developed, independent of barren rules, and a foundation laid for ripe and accurate scholarship. Especial attention is paid to the rendering of English into Latin and Latin into English, in writing. Such translations are criticised and returned to the student, with accompanying lectures on the principles involved

II.-SCHOOL OF CREEK.

PROF. SEMPLE—pro tem.

The subjects taught are the Greek Language and Literature, and the History of Greece. In this school there are three classes—Junior, Intermediate and Senior.

I.—In the Junior Class a thorough review is made of the inflections, and the principles of the language are explained and illustrated by daily translations from English into Greek, and from Greek into English, with written exercises in both.

Text Books: Kuhner's Elementary and Hadley's Grammars, Xenophon's Anabasis and Cyropedia.

II.—In the Intermediate Class the Greek syntax is explained, partly by lectures and partly by written translations from the English into Greek. The subject of accent is taken up; its laws are presented, and the student is taught, in his exer-

eises, its practical use. The authors read are Demosthenes and Homer. In addition to what is studied in the class, a course of parallel reading is prescribed.

Grammars: Kuhner's, Hadley's.

III.—The Senior Class is instructed mainly by lectures. First: On the Grammar of the Greek language. Second: On Greek History and Literature.

Translations are made from the best Greek authors, and are required to be rendered into the original by the student. These exercises are criticised and returned, and explanations are made of the principles involved. Thus the Syntax will be illustrated by all the different constructions which occur in the language. The authors read are: Thucydides, Sophocles. Euripides and Plato. A close and critical examination is made of the text assigned for reading, the peculiarities of the author's style are brought out, and the Comparative Philology of the language is constantly illustrated.

Text Books: Teubner's Leipsic edition of the Classics, Smith's History of Greece, Long's Classical Atlas, Hadley's and Kuhner's Grammars, Liddell and Scott's Greek-English, and Yonge's Fnglish-Greek Lexicons.

III.-SCHOOL OF MATHEMATICS.

PROF. CLARK.

· In this school there are four regular classes, viz: The Junior, Intermediate and Senior classes of Pure Mathematics, and the class of Mechanics and Astronomy.

The requisites for admission into the Junior Class are: Arithmetic, Algebra to Quadratic Equations, and three books of Geometry. Students who are deficient in these branches will find suitable classes in the Preparatory school.

COURSE OF STUDY.

Junior Class.—Algebra, completed; Geometry, completed; Elements of Plane Trigonometry and Surveying. Text Books: Schuyler's Algebra and Geometry, Ray's Surveying.

INTERMEDIATE CLASS.—Trigonometry, completed; Analytic Geometry. Text Books: Those of the Junior Class and Ray's Analytic Geometry.

Senior Class.—Differential and Integral Calculus. Text Book: The Professor's Calculus, published in Ray's Series.

CLASS OF MECHANICS AND ASTRONOMY.—Text Books: Smith's Mechanics, Loomis's Astronomy, with Mathematical Notes by the Professor.

Satisfactory examination in all the classes of the above course is required for graduation in the school of Mathematics, or for the degree of A. M. For the degree of A. B., the required studies are Algebra, Geometry, Plane and Spherical Trigonometry; the remaining studies of the course are elective. During the second term of the collegiate year there is an additional class open to all students who have completed Trigonometry. In this class instruction is given in the various branches of Surveying, including the use of the Transit and Solar Compass, Railroad Surveying and Leveling, Topography, etc. Attendance upon this class is optional, but a certificate of proficiency will be awarded for satisfactory attainments therein.

IV.-SCHOOL OF NATURAL SCIENCE.

ROF. EATON.

In this school the best facilities will be afforded for a thorough and practical knowledge of the Natural Sciences with respect to the interests of every day life, and to their harmony with the Divine revelation. Each subject is illustrated by lectures and experiments. In the Department of Chemistry there is a well-furnished Laboratory, stocked with a full sup-

ply of necessary chemicals and apparatus, and the department of Natural Philosophygis well supplied with superior and improved forms of apparatus. Constant additions are being made to both departments.

The senior students of Chemistry are, in turn, put into the Laboratory, and required to experiment and lecture before the class upon the various questions involved; thus acquiring a facility in manipulation, and appractical knowledge of the subject not to be attained by the mere study of text-books and attendance upon the lectures of the Professor.

Before entering upon this school the student is supposed to have a knowledge of Plane Geometry and Plane Trigonometry, and for *graduation* the Junior course of Latin and Greek is required.

COURSE OF STUDY.

JUNIOR CLASS.—Natural Philosophy—Lectures and Recitations.

Intermediate Class.—Theoretical Chemistry—Lectures and Recitations.

Senior Class.—Geology, Dana's Manual, Analytical and Applied Chemistry, Laboratory Practice. Dectures and experiments by members of the class.

V.-SCHOOL OF MODERN LANGUAGES.

PROFS. SEMPLE AND CLARK.

The languages embraced in this department are French, German and Italian. In French and German there are two classes for each—Junior and Senior—in Italian, one.

In each language the elements of Grammar are thoroughly studied by means of text books and explanatory lectures. Frequent exercises in translation from English to the respective languages are required throughout the session, and thus a practical familiarity with the idioms and construction is acquired.

TEXT BOOKS.

FRENCH.

Junior Class.—Otto's Grammar, Fasquelle's Dumas' Napoleon, Surenne's Dictionary.

Senior Class.—Otto's Grammar, Picciola, Joynes' edition of Classic French Plays, Pylodet's Litterature Française Contemporaine.

In addition to the above, candidates for graduation are expected to read, in private, portions of such standard French authors as may from time to time be recommended.

GERMAN.

Junior Class.—Otto's Grammar, Whitney's Reader, Select Plays from Schiller, Goethe, &c., &c.

ITALIAN.

Monti's Grammar, I Promessi Sposi, Le Mie Prignione, Monti's Reader, Grassi's Dictionary.

VI.-SCHOOL OF ENCLISH AND HISTORY.

ASSISTANT PROFESSOR C. A. BUCHANAN.

The course of instruction in this Department is made broad and thorough, to meet the increased attention now given to English Philology. The course includes:

I. The History of the Language. The Anglo Saxon is made a prominent topic of study, and the changes in the language from the earliest times to the present are carefully noted.

II. The present structure of the language. The istudent is required to study the lexicography of the language or the etymology or more accurate signification of the separate words, with the Philosophy of English orthography and the principles of pronunciation; the grammatical combination of English words into sentences, and the rhetoric of the language, or its most effective use in connected discourse.

III. The Literature of the Language. A review is made of the principal authors from the early period to the present day.

Instruction is also given in the laws of Oratory or the most effective use of the spoken language in public discourse. Orations are delivered each week by members of the department in the presence of the whole College.

The course of History includes a general review of Medieval and Modern History, with a special study of the histories of England and the United States. The members of the class are also instructed in the true methods of historical research.

VII.-SHERWOOD SCHOOL OF MORAL PHILOSOPHY.

PROF. ROTHWELL.

The name of this school is intended to perpetuate that of Rev. Adiel Sherwood, D. D., than whom few living men have done more to promote the interest of education in the Baptist denomination. He was first to propose to aid in endowing this chair by the gift of \$1,000. The proposition was laid before the Baptist General Association, at its annual meeting held at Columbia, Boone County, Missouri, 1869, and in forty

minutes, thirty others associated themselves with him, and gave his name to the school as an evidence of their veneration.

The object of this science is to acquaint the mind with the knowledge, command and employment of its own faculties. The topics embraced in it are Mental Science, Logic, Ethics, Political Economy, Natural Theology, Jurisprudence, and the Evidences of Christianity; or, the mind, our relations to good, to temporal affairs, to God and eternity, to the State, and to the Christian religion.

The course pursued in this school is to accustom the student to make severe analysis of his own mental actions in the examination of every topic brought under his notice, and at the same time to put him in possession of the observations and opinions of thinkers who are affecting society and human destiny.

VIII.-JEREMIAH VARDEMAN SCHOOL OF THEOLOGY.

PROF. ROTHWELL.

The regular course of this school is intended for two years, in the case of those who are fully prepared to proceed with the study of the Scriptures in the Greek or Hebrew, or who have taken the first degree in College. But to afford profitable instruction to those who have not a classical education, and to those who desire to study. Theology at the same time that they pursue their literary studies, the course is so arranged as to be pursued in connection with a literary course, and parts of it which are adapted to the development of men tal power, are taken, by agreement of the Faculty, in lieu of proportionate parts of the literary course in the examination for degrees.

COURSE OF INSTRUCTION.

First Year.—Sacred Geography and Biblical Antiquities. Text Book: Barrows.

Second Year.—Evidences of Revealed Religion, Introduction to the Books of the Old Testament, Introduction to the New Testament, Principles of Interpretation. Text books: Angus or Barrows:

Then Year,—Systematic Theology and Church Order. Text Books: Dagg and Hovey.

FOURTH YEAR.—Hebrew. Text Books: Deutsch's Hebrew Grammar, Gesenius's Lexicon, Hebrew Bible.

FIFTH YEAR—Homiletics and Church History. Text books: Broadus on Preaching and Kurtz's Church History.

The connections of Theology with Mental science and Ethics are taught in the School of Moral Philosophy. The relations of Natural Science and the Bible are discussed by the Professor of Natural Science, who also gives a course of lectures on Natural Theology. Thorough instruction in the original language of the New Testament is given in the School of Greek.

The College Library is peculiarly rich in valuable and rare aids to the ministerial student. The bi-weekly meetings of the Evangelical Society, and the weekly meetings of the Literary Societies, form habits of correctness in the use of tongue and pen. Besides morning worship in the Chapel, the students hold a daily prayer-meeting in the evening, of their own accord, characterized by a lively and gracious spirit of devotion. On Sabbath, students join in public worship with the Church. They enter society and enjoy the social intercourse of Christians, take part in prayer-meetings and instructions of the Sunday school and Bible classes; and keep thus in living connection with the work of the Church and the benevolent enterprises of the day. Those who are able to preach to

edification are encouraged to do so, but only to such extent as not to conflict with regular recitations or lectures. No student will be retained in this department who is not heartily in car nest and devoted to the work of preparation for his ministry.

Students will be subject to the same regulations as to written examinations and graduation in the school of Theology as in the other schools of the College.

COLLEGE COURSE.

(The following tabular statement of studies in the several schools is given to enable the student to arrange his studies from session to session with a view to graduation in Arts, Science, or Literature. What parts of the course are optional or elective in ordering his studies with reference to any one of these degrees, the student can see by referring to the Article "Degrees," and to Remarks of Professors upon their respective schools.)

PREPARATORY REQUIREMENTS.

Mathematics.—Arithmetic, Algebra to Equations of the Second Degree, Geometry to Book IV.

English and History.—English Grammar, English Composition, Geography, United States History, correct Spelling, and good Penmanship.

Latin.-Grammar, Exercises, Casar.

FIRST YEAR.

Mathematics.—Algebra, Geometry, Elements of Plane Trigonometry and Surveying.

English and History.—Rhetoric, Rhetorical and Elocutionary Exercises.

Latin.—Grammar, Virgil, Sallust, Cicero's Orations, Arnold's Prose composition, History of Rome.

Greek.-Greek Grammar, Xenophon.

Natural Science.—Natural Philosophy.

SECOND YEAR.

Mathematics.—Trigonometry completed, Analytical Geometry.

English and History.—Hume's England, English Literature.

Latin.—Horace, Livy, Cicero, Arnold's Prose Composition.

Greek.—Demosthenes, Thucydides, Homer, Composition.

Natural Science.-Natural Philosophy.

THIRD YEAR.

Mathematics.—Differential and Integral Calculus.

English and History.—Gibbon's Decline and Fall, Guizot's History of Civilization.

Latin.—Livy, Tacitus, Juvenal, Classical Literature, Original Composition.

Greek.-Plato, Sophocles, Lectures, History and Civilization.

Natural Science.—Theoretical Chemistry.

Moral Philosophy.—Psychology, Logic.

Modern Languages .- French and German.

FOURTH YEAR.

Mathematics - Rational Mechanics, Astronomy.

English.—Anglo-Saxon, Reading of the English Classics.

Modern Languages.—French and German.

Moral Philosophy.—Ethics, Political Economy, International Law.

Natural Science. - Geology and Practical Chemistry.

PREPARATORY DEPARTMENT.

This Department is under the general direction of the Faculty, but subject more especially to the individual management and control of the Principal, who will give it his exclusive attention, and, except as otherwise provided, the students therein will, during the day, remain under his personal supervision. He will be aided by the other members of the Faculty, who will give instruction in their several departments as may be needed. Any student in the Preparatory Department shall have the privilege of entering any class in the Collegiate Department for which he is properly qualified, and any student in the Collegiate Department may recite or review in any of the classes of the Preparatory Department.

The commencement and close of this school are the same as those of the College. The recitation and study hours are from 8:45 a. m. to 12 m., and from 1:80 p. m. to 4 p. m. During these hours no student is permitted to be on the streets except in going to and from his home or boarding house, unless it be with the express consent of the Principal. At night, during study hours, all are required to be in their respective rooms.

Two examinations are held during the year—one at the close of the first term, and the other at the close of the second, the results of which are announced on the Final Day.

COURSE OF STUDY.

First Division.—Reading, Spelling, Arithmetic, Geography and Map Drawing, History, English Grammar, Latin, Penmanship, Declamation and Composition.

Second Division.—Reading, Spelling, Arithmetic, Geography and Map Drawing, History, Elementary Instruction in the Natural Sciences, English Grammar, Latin, Greek, Algebra, Geometry, Book-Keeping, Elecution Composition and Penmanship.

The most approved text-books will be used. The Preparatory Department is designed to give a thorough preparation for the College course, and is organized with a special view to that end. But to those who cannot pursue a full College course, it will give such a practical training as will fit them for the ordinary duties of business life.

ADMISSION AND WITHDRAWAL.

An applicant for admission will first pay the fees due the Treasurer and will then enroll his name with the President or Chairman of the Faculty, who will give direction for his admission to the selected schools.

Each student, before he withdraws, shall have a written dismission from the President or Chairman of the Faculty. Dismissions, thus obtained, will state the standing of the student on his withdrawal, and will provide for his restoration to his classes, should he ever return.

Tuition fees will in no case be returned by the Treasurer except for protracted sickness, and then only for so much time as the student was disabled thereby from attending his College duties.

EXAMINATIONS.

Each Professor examines his class orally at every recitation or lecture, and keeps a merit roll, the marks in which are modified not only by the verbal accuracy of the answers, but by the clearness of the understanding shown. Merit marks are reported frequently to parents and guardians.

Two general examinations of each class are held during the session—the first, called the Intermediate Examination, occurring about the middle of the session, and the second, called the Final Examination, taking place in the closing weeks, each embracing the subjects treated in the half year immediately preceding. These examinations are conducted in writing. The questions propounded have numerical values attached, and if the values of the questions fully answered amount to three-fourths of the aggregate valuation, the student is ranked in the "first division;" if less than three-fourths, in the "second division."

Certificates of Distinction are awarded to those attaining the rank of "first division" at either of the examinations, and their names are published at the closing exercises of the session. The general examinations are so comprehensive and searching as to render it impossible for the student to secure a place in the "first division" without great diligence. The results of these examinations are publicly announced on the Final Day.

The examinations or graduation are held in the last month of the session, and they are conducted in each school by the Professor in charge. The candidates for graduation are subjected to searching interrogations, not only on the general principles, but also on the details of the subject, and they are expected to be accurately versed in all the topics treated of in the lectures and correlative text. In no case will a degree of any kind be conferred where the average "estimates" are below the first rank. The standing of the student at the daily and general examinations is taken into account in ascertaining his qualification for graduation in any of the schools.

The written papers are submitted to the President, and by him reported to the Trustees, who, through a committee, examine them at their Commencement Session and file them in the College rolls.

As a familiarity with the principles of the English Language is indispensable to the attainment of even the inferior honors of the institution, a student must pass a satisfactory examination in the Junior Course of English and History before he can be admitted to a degree in any other school.

DEGREES.

The following degrees are conferred:

1. The degree of Graduate in a particular school, which requires a satisfactory examination in the subjects taught in that school.

- 2 The degree of Bachelor of Literature, conferred upon one who is a graduate in the schools of English and History, Latin, Greek, French (or German), and Moral Philosophy.
- 3. The degree of Bachelor of Science, conferred upon one who has passed a satisfactory examination in the Junior Course of English and History, Latin, Greek and Moral Philosophy, and has graduated in the schools of Mathematics, Natural Science and French.
- 4. The degree of Bachelor of Arts, conferred upon one who is a graduate in five schools of the College, and has fair standing in the Junior and Intermediate classes of two other schools.
- 5. The degree of Master of Arts, conferred upon one who is a graduate in all of the schools except Theology.

No student is allowed to graduate in any school in the College, or to receive any certificate of proficiency, until all his dues to the College are paid.

PUBLIC WORSHIP.

At fifteen minutes before nine o'clock each morning the Faculty and students assemble in the Chapel. A portion of the Scriptures is read and prayer offered—one of the Professors conducting the exercises, each in turn—and all unite in singing a selection of sacred music, led by the College Choir. There is also a daily evening prayer-meeting held in the Hall of the Evangelical Society at 6 to 6:30 p. m—which has been voluntarily conducted among the students for several years, and which has been attended by very gracious influences. All the students are expected to attend public worship on the Sabbath.

LITERARY SOCIETIES.

There are two Literary Societies, the Philomathic and Excelsior, which have spacious Halls, elegantly furnished, in the College building, where they meet each Friday evening for debate and other literary exercises.

The Evangelical Society meets every other week to engage

for mutual improvement in Homiletic Exercises, and to investigate Religious topics.

The Society of Alumni holds an annual session in connection with the College Commencement, and provides for an oration from some one of its members.

The Literary Union, an association among the students for various purposes, provides for holding literary contests during the year, and awarding prizes in Orthography, in Reading, in Composition, in Declamation and in Oratory.

This Society also conducts the publication of the WILLIAM JEWELL STUDENT—a monthly—devoted to Literature, Science, Morals and general College News.

LIBRARY AND READING ROOM.

The Library of the Colege contains 3,500 volumes, including the principal encyclopedias and many rare and choice works. The number of volumes is increasing each year by gift and purchase. The Assistant Librarian keeps the Hall open at certain hours at which all students have access to it as a Reading Room, and to take out any books desired. A number of the best secular and religious newspapers and magazines are kept on file, and also the numerous exchanges of the William Jewell Student.

AID TO MINISTERIAL STUDENTS.

The Board of Ministerial Education of the Baptist General Association of Missouri have a fund of about \$5,000, from the interest of which, with contributions from Auxiliary Societies, from churches and individuals, young men of the Baptist denomination who have devoted themselves to the Gospel Ministry receive such aid, when needed, as can be given. All such, bringing testimonials from their churches and being ap-

proved by the local Board of Ministerial Education at Liberty, receive tuition free. Tuition is also free to the sons of our Ministers living by the ministry.

THE COLLEGIATE YEAR.

The session of College commences on the first Thursday in September, and continues without interruption till the second Thursday in June. It is divided into two terms—the first closing on Wednesday, the 24th day of January; the second on the Commencement Day.

No student is allowed to be absent during the Collegiate session without special leave. Absence, even for a few days, occasions a greater injury to the student than is generally supposed by parents and guardians.

EXPENSES.

Tuition in College Classes, per term, in advance	20	()()
Tuition in Preparatory Department, per term, in advance	20	00
Fee for Fuel, Janitor's Services, etc., per term, payable by all	1	00
Fee for Chemicals, by Class in Chemistry, per session, in advance	10	00
Library Fee, per term, payable by all		50

BOARDING FOR STUDENTS.

Each student—or his parent or guardian for him—makes his own arrangement for boarding. Good boarding in private families from \$3.00 to \$4.00 per week.

ELY HALL,

a large and well-ventilated three-story brick building, erected on the College grounds at a cost of \$10,000, is intended to extend to Literary students, who desire it, the same facilities of boarding at actual cost that the Ministerial students have hitherto enjoyed. Besides rooms for cooking, dining hall, &c., the building contains 20 rooms for studying and lodging. These rooms will be furnished with bedstead, stove, wash stand, table and hangings for clothes. Thus furnished, the rooms will be rented to students at the rate of \$1.00 per month to each student, for the larger rooms, occupied by three or four; for the smaller rooms, occupied by two only, the rent will be \$1.50 to each student. The room-rent will be required in advance for each five months term, as in the case of tuition. The rooms will be in charge of a steward, appointed under regulations prescribed by the College government. Students occupying these rooms will forfeit the privileges of the building, by a vote of the Faculty, for disorder, or idleness, or interruption of others.

The dining-hall and cook-room will be in charge of the Boarding Club, which has been in successful and satisfactory operation for eight years; and board will be furnished to the occupants of the building, as well as to members of the Club, at the actual cost, which has averaged about \$1.50 to \$1.75 per week. Board and room rent will be about \$2.00 per week, to which must be added cost of fuel and lights. It is the ardent hope of the Trustees and Faculty that by these facilities many young men may be enabled to take a college course, who otherwise could not.

The dormitories in the College building will be furnished to Ministerial students, only, on same conditions as heretofore.

THE WORK OF THE FINANCIAL AGENT.

In building up a College and providing for its future growth and usefulness, no part of its management demands more wise and careful supervision than its finances. For a number of years, this great interest of the College has received the continuous attention of the Financial Agent, L. B. Ely, of Carrollton. In the past two years he has succeeded in raising by contributions from the Baptists of Missouri, the sum of

Fifty Thousand Dollars as an addition to the Endowment of the College. He is now engaged in collecting and investing this sum in otherwise promoting and enlarging the Endowment. The foundations of this great interest are now faithfully and securely laid, but so far from resting in this we must press forward to yet greater achievements. Certainly this much can be said, that the greatest encouragements are now afforded to yet larger givers that their investments in Christian education in William Jewell College will be permanent. Who will erect a Scientific Building for the Departments of Natural Science and Astromony? Or who endow yet other Chairs or Fellowships in the College?

LOCATION.

The College is situated at Liberty, Clay County, Missouri, a quiet town of about 2,000 inhabitants. It is on the Kansas City Division of the Hannibal and St. Joseph Railraad, within three miles of the Wabash, St. Louis and Pacific Railway and Missouri River at Liberty Landing, and within fifteen iniles of Kansas City, which is the focus of thirteen railroads. It is, therefore, accessible with ease to all parts of Missouri and the adjacent States.

CORRESPONDENTS

Wishing information concerning admission, course of study, and all matters pertaining to the internal affairs of the College, address Prof. Rothwell, Chairman, or Prof. Clark, Secretary of the Faculty, Liberty, Mo. Respecting notes, lands, &c., of the College, J. T. Chandler, Liberty, Mo. Respecting the general fiscal affairs of the College, and especially all matters pertaining to the effort to further endow the College, address L. B. Ely, Carrollton, Mo. Concerning matters pertaining to ministerial education, address W. R. Rothwell, Liberty, or any officer of the Missouri Baptist Ministerial Education Society.

CALENDAR FOR 1883-'84.

Opening of Session -- Thursday, Sept. 6th, 1883.
