BOARD AND ROOM.

The cost of rooms and board in the various dormitories of the college will be found on page 5 of this bulletin. Students rooming in Ely Hall will be required to care for their own rooms and to furnish their own bed clothes and towels; otherwise the rooms will be neatly and comfortably furnished. They have steam heat, electric lights, hot and cold water.

Rooms in New Ely Hall are swept and cleaned by janitors, but students are required to make their own beds and to keep their rooms in order. They must also furnish their bed clothes and towels.

Students rooming in the cottages are required to care for their own rooms, to furnish their own bedding and lights and to make their own fires. Fuel will be furnished by the College.

Students rooming in the dormitories will be required to take their meals in the dining hall.

The discipline of the dormitories and dining hall is in charge of Dr. Cook. Rooms will be forfeited for disorder, negligence, idleness or bad conduct.

ALLOTMENT OF ROOMS.

The students occupying rooms in any of the dormitories may retain them for the coming year by making application previous to May 15th. A deposit of \$5.00 must be made at the time of making the application, and the remainder of the room rent must be paid not later than the opening day of the next session. Rooms not so paid for in full will not be held and the deposit will be forfeited.

All rooms vacant on May 15th will be assigned by lot to the applicants at that time. Subsequent to the annual allotment vacant rooms will be given to applicants in the order of their application, upon the above mentioned terms as to deposit and payment of rent.

ROOMS NOT IN DORMITORIES.

Students unable to room in the College dormitories will be allowed to room at places approved by the President. Each student is required to file his place of residence with the Treasurer, and also to give notice of any change he proposes to make in his rooming or boarding place. A list of approved boarding and rooming places will be supplied the student from which he must make his selection. Board and room may be had in the town at from \$4.00 to \$5.00 per week. Some students have greatly reduced their costs of living by renting rooms and "baching." This mode of living is undesirable and never advised except as the only means of getting an education.

FREE TUITION AND FINANCIAL AID.

William Jewell College gives free tuition to ministerial students and sons of ministers. Application for free tuition must be made to the College Treasurer. Every student for the ministry must present either ordination papers or a license to preach or the formal approval of his church.

The College and the Baptist Ministerial Education Society of Missouri coöperate in giving financial aid to worthy and needy students for the ministry, who have been in school at least a year—in return for this the students are expected to do a reasonable amount of work for the College.

Various opportunities are open to literary students by which they can earn a part, if not all, of their expenses. The President has a small private fund that is also available for literary students when they are in temporary need.

SCHOLARSHIPS.

There are available thirty-four scholarships, for tuition, governed by donors (for sons or grandsons) or by churches, as follows:

Seven perpetual scholarships, for tuition, governed by donors while they live; after their death governed by the faculty of the College.

Students 1902-1903 scholarships, perpetual, for tuition, governed by the faculty and open now to competition.

Melvin Scholarship, perpetual—established by Mrs. Mary M. Melvin, by will, in honor of her husband, Thos. F. Melvin, also deceased.

John Sillers Scholarship, perpetual.

Marston Scholarship—This scholarship yields \$200 and is for a William Jewell College graduate in Brown University, and is open to competition under rules prescribed by the faculty. The scholarship was founded by Mr. E. L. Marston, son of Rev. S. W. Marston, D.D., who was for three years, from 1873, Superintendent of State Missions for the General Association.

Dr. Marston is remembered especially as contributing largely and valuably, in specimens, to the College Museum.

MEDALS AND PRIZES.

THE PROSE MEDAL—Dr. J. E. Cook offers a gold medal for the best prose article contributed to *The Student* during the session.

THE POETRY MEDAL—Formerly given by Professor R. P. Rider for the best poem contributed to *The Student* during the session, will be continued.

THE SENIOR SOCIETY MEDALS—The two senior literary societies, offer, jointly, to their members, gold medals for oratory, debate, essay, reading and declamation.

THE JUNIOR SOCIETY MEDALS—The two junior literary societies offer, jointly, to their members, gold medals for oratory, debate, essay, reading and declamation.

THE D. A. R. AMERICAN HISTORY PRIZE—A gold medal is offered by the General Alexander Doniphan Chapter, Liberty, Mo., of the Daughters of the American Revolution for the best essay on some assigned subject. This year's subject is "Missouri's Part in the Civil War."

THE WILLIAM M. FITCH PRIZE—William M. Fitch, '93, offers a fifteen-dollar gold medal annually to the student who writes the best essay on some specified sociological subject.

THE FRANK B. HEARNE MEDAL IN CHEMISTRY—By the will of Mrs. Roberta Lee C. Hearne, of Independence, Missouri, "the Trustees of William Jewell College are directed to purchase annually a medal to cost approximately \$50, such medal to be known as the Frank B. Hearne Medal and awarded annually as a scholarship medal for excellency in the study of chemistry. At the discretion of the Trustees, and with the approval of the recipient, the sum of \$50 in gold coin may be awarded. The bequest is in affectionate remembrance of her husband, Frank B. Hearne, whose college education was obtained at William Jewell." This prize will in general be awarded to a member of the graduating class, but in exceptional circumstances may be given to a lower class man.

ORDER.

Every student accepted for matriculation is required to sign a pledge to obey the rules and regulations of the College. Students are granted every privilege consistent with good morals and good scholarship, but the Faculty reserves the right of sending any student home whose habits are considered inconsistent with the ideals of the institution.

Leaving town during week days or nights and using this time for other purposes than the pursuit of school duties are marks of an *undesirable* student. Visiting Excelsior Springs, or Kansas City, or any other out-of-town place, at *any* time, without a reason acceptable to the Faculty, will not be tolerated.

A student who fails to comply with these regulations, as well as with all others pertaining to honest work and moral living, may expect to be summoned before the Student Council, or the Faculty, or both, to account for his actions.

CHAPEL.

Chapel exercises are held daily at 11:30. This convocation is not only for the purpose of holding religious exercises, but also to hear public announcements and to cultivate college spirit and good fellowship.

Students are required to attend chapel on an average of four times per week for each term. If a student fails to make this average one hour credit will be deducted from his record for each unit of difference between his average attendance and the four times required.

LIBRARY.

The library contains nearly 27,000 bound volumes, thoroughly cataloged, and embraces also the Spurgeon Collection. The reference room receives regularly about 140 of the leading periodicals. The library is open week days from 8:00 a. m. to 6:00 p. m., except Saturday afternoons. It is also open Tuesday and Thursday evenings from 7:00 to 9:00. No fee is charged students for the use of the library.

LABORATORIES.

The classes in chemistry and physics are located in the new Science building, which has cost about \$100,000 and is a thoroly modern, fireproof structure, provided with every facility for this work. Eventually all of the science work will be located in this building.

REQUIREMENTS FOR ENTRANCE AND GRADUATION.

The College offers two courses of study leading to the degrees, A.B. in Literature and A.B. in Science, which for convenience will be designated as Groups A and B, respectively.

Fifteen units are required for entrance to either group and in addition 186 term-hours of college work are required for graduation.

A unit of work is the standard unit of the high schools approved by the Superintendent of Public Schools of Missouri.

In the table below will be found the subjects absolutely required for entrance to the Freshman class. Any work of the grade done in an approved high school will be accepted for entrance, but never in greater quantity than is recommended by the department of education of the state.

The amount of credit given on work done in non-approved high schools will be determined by the committee on entrance work.

GENERAL NOTES ON THE COURSES OF STUDY.

EXTRACTS FROM THE COLLEGE REGULATIONS.

I. A student must offer for his graduation at least one of the groups of absolute requirements and also a sufficient number of free electives to aggregate 186 term-hours of college work. The A.B. degree will not be granted to anyone who has not spent at least three terms in the college.

II. No student will be given both entrance and college credit for the same work. If a student, who has offered a course for entrance, repeats a similar course in college, he shall not receive more than two-fifths of the usual college credit therefor. If a student is allowed entrance credit on any subject and later elects or is required to review this work in the sub-collegiate department he shall lose the entrance credit until he makes a passing grade therein in the regular way.

III. If a required college course should be offered for entrance, the number of absolute college requirements is thereby reduced, leaving a larger number of electives.

IV. Every student must carry at least three required courses throughout each term of his freshman and sophomore years, and must pursue these courses in their proper order.

V. A student who has not satisfied the college entrance requirements, must, as far as possible, choose subjects that will remove entrance conditions. In no case shall a sub-collegiate student take or receive credit for a course for which there is a college prerequisite, or which is intended primarily for students classified beyond the freshman year.

CLASSIFICATION.

The classification of students is confined to the following heads: Sub-collegiate, Freshman, Sophomore, Junior, Senior.

(a) A student shall be classified as *Freshman* if the number of term-hours required for his graduation lies between 162 and 108, including his conditions for entrance and excluding the year's work in actual progress.

(b) He shall be classified *Sophomore* if the number of term-hours required for his graduation lies between 107 and 54 under the same conditions as above.

(c) To be classified a *Junior*, the student shall have removed every condition for entrance to college, and the number of term-hours required for his graduation shall lie between 53 and 1, excluding the year's work in actual progress.

(d) If a student has met all conditions for entrance and there remain no requirements for his graduation besides the year's work in actual progress, he shall be classified a *Senior*. No student can be classified Senior unless he has already had placed to his credit three term-hours of physical education.

(e) College students carrying no conditions are limited to 18 normal hours of work, others are limited to 20 hours. This does not include work in physical education, but includes all other work for which credit is given.

(f) Students are not permitted to carry less than 12 hours of work without the consent of the faculty.

(g) No student will be permitted to drop or exchange a study later than one week after the beginning of the term without the consent of the faculty.

(h) Summer work and work under tutors may be done privately, but it must conform to the rules of the college.

GRADING AND EXAMINATIONS.

I. Grades are expressed by the letters S, A, B, C, D and F. On a basis of 100 per cent, F indicates a grade below 60 per cent, D from 60 to 69, C from 70 to 79, B from 80 to 89, A and S from 90 to 100 per cent, S indicating the highest order of excellence. These letters represent an average between the class grade and the examination grade, but no student can pass a subject in which he has not received both a class grade and examination grade of at least D. Credits published with the courses are known as "normal credits."

II. Students who receive the grade S will be given 120 per cent of the normal credit, those receiving A will be given 110 per cent of the normal credit. The grade B entitles the student to the normal credit, but only 90 and 80 per cent respectively of the normal credit will be given for the grades C and D. The grade S is not given except by vote of the faculty.

III. In classes of more than ten students the number of A and S grades combined must not exceed 15 per cent of the number of students in the class. This per cent may suffer an occasional increase in smaller classes.

IV. This system of increasing and diminishing normal credits does not apply to sub-collegiate studies.

V. If, in a required course, a student passes but fails to make the normal credit, he will not be required to make up the deficiency in any especially designated course.

VI. A student who does not make passing grades in at least eight hours of his work in any term will not be allowed to enroll for the next following term; except that if he can show a reasonable excuse for his failure, such as sickness or prolonged absence for an excusable reason, he may be admitted by special vote of the faculty. Reports setting forth the student's progress in scholarship and deportment will be sent to parents and guardians at the end of each term and at mid-term periods when it is deemed advisable.
